Battery Usage Guide

SUPER HEAVY DUTY

Cellmax Super Heavy Duty Batteries have outstanding durability. They are specially designed to provide lasting, economical power in a wide range of low drain devices such as flashlights, radios, remote controls and clocks.

RECHARGEABLES

Our Rechargeable batteries provide you reusable support for your entertainment, mobile and toy applications. Including Ni-Cd and Ni-MH products, this product line offers you sizeable benefits: up to 1000 recharging cycles, minimal memory effect, high capacity and long service life.

PHOTO LITHIUM

Photo Batteries offer durability and high performance. These products use high quality lithium technology specially designed for camera use. Shelf life is up to an outstanding 8 years.

MICRO BATTERIES

Small electronic items demand even smaller batteries. Cellmax button cells provide high energy in small packages. They are suitable for keyless entry, calculators, cameras, hearing aids and many other electronic gadgets.

- Light and comfortable
- Digital hearing aid compatible
- Reliable, steady power output
- Easy to use
- Leading edge technology

ULTRA ALKALINE

Cellmax Alkaline batteries are built to readily start up high drain devices with dynamic instantaneous power. In addition:

- Delivers a stable current for several hours
- Has long lasting power and shelf life
- Is ideal for most high power operated devices such as CD players, toys, PDAs, electronic games, headphones and more.

DIGITAL ALKALINE

Cellmax Digital Alkaline batteries offer the maximum capacity from a single use battery. They are developed using the latest advanced technology, providing up to 6 times longer lasting power than ordinary Zinc batteries. They can:

- Readily start up high drain devices with dynamic, instantaneous power
- Deliver a stable current for many hours
- Offer long lasting power and shelf life
- Provides long lasting power in today's growing list of high drain devices such as digital cameras, handheld games, wireless computer devices, and game controllers.

HEARING AID BATTERIES

Dependable Cellmax hearing aid batteries combine long life and high performance. Plus have a long shelf life up to 2 Years.

Display Programs

POWER STATION

The Power Station and Energy Centers are stocked with Cellmax batteries and Glowmax flashlights. These displays make it convenient for customers to find the batteries and flashlights they are looking for. Keeping things neat and easy to find, these displays pack a mass of product in a small space. Even the display signage can be custom made with your store branding on top.

POWER PANEL

The Power Panel, like its big brother the Power Station, can be stocked with Cellmax batteries and Glowmax flashlights. The display mounts easily to the side of your end cap or can even be used as a free standing unit.

TOP SELLERS

Our Top Selling Counter Display is designed to hold the best selling battery sizes (AA, AAA, C, D, and 9V) and fits conveniently on your counter top to remind customers to grab batteries for their devices. The display stocks Cellmax batteries and can even be customized to hold what you sell most.

Light for the Fight

Shine a Light on Breast Cancer Awareness

October is National Breast Cancer Awareness Month, but you can show your support all year long with our BCA 9 LED flashlight. This light sells extremely well not just in October but throughout the year. Best of all, a portion of the sale of these lights will be donated to help end breast cancer.

-  Breast cancer is the **most common** cancer and the second most common cause of cancer deaths in the United States.
-  If breast cancer is detected in the earliest stages there can be a **95% survival rate**.
-  In the United States over **200,000 women** and close to **2,000 men** will be diagnosed with breast cancer during 2012.
-  Approximately **40,000 people** will die of the disease this year.

Consumer Buying Trends

**The Flashlight market has changed.
Are you maximizing your shelf space?**

Once just a household item used for power outages or the occasional camping trip, the flashlight consumer is now purchasing out of impulse.

Retail Flashlight Market by Price Tier

In today's retail stores Flashlights that cost less than \$15 account for 71% of in store shelf space. The average category spend is \$10 a purchase.

Data from AO in-store survey
Source: Nielsen Consumer Facts-AO

Battery Checklist

The average home has close to 30 battery powered devices that are used regularly. Chances are your home or office has a device that needs new batteries. Don't wait until your battery runs out to replace it. This checklist will help you keep an inventory of the batteries you need to keep on hand.
